Based on our call this afternoon here are the links to the revised Risk Based Concentration Tables:

1) A description of the changes between the June 2011 tables and the November 2011 tables-

[http://www.epa.gov/reg3hwmd/risk/human/rb-concentration\\_table/whatsnew.htm](http://www.epa.gov/reg3hwmd/risk/human/rb-concentration_table/whatsnew.htm)

2) The tap water tables from November 2011

[http://www.epa.gov/reg3hwmd/risk/human/rb-concentration\\_table/Generic\\_Tables/index.htm](http://www.epa.gov/reg3hwmd/risk/human/rb-concentration_table/Generic_Tables/index.htm)

I pulled the "Residential tap water" tables

3) a DRAFT table of the pre-drilling and post drilling analysis (highest levels reported) for eight of the 19 homes in the Dimock area. I started with these homes because they were untreated, or had treatment systems that had shown to be unreliable for some sampling

Karen D. Johnson, Chief  
Ground Water & Enforcement Branch
